

THE PERSONAL ROBOT

Last Updated: Dec 18th 2023

Temi robot OS version 132 release notes

temi should prompt a message saying that an update is available, if temi doesn't display the message please go to Settings and tap Software update to update your temi.

If temi prompts "no pending updates" please contact our Help Desk via our website, mobile app or temi Center, or at 833-902-0202.

To verify your *temi* has been updated, go to Settings > About and make sure that:

"Launcher OS" shows 17711

"Robox OS" shows 132.04

"firmware" shows 20221220

To verify your *mobile app* is the most updated version - go to the About tab in the temi mobile app and verify your version number is as follows:

iOS users – 1.1.64

Android users – Version 1.3.8969

For full details regarding this update and the new and improved features, please refer to our [User Manual](#), the [temi Center User Manual](#) and [tutorial videos](#).

Here are some of the main improvements this update will bring into your temi:

temi Center:

- Supporting new feature “One-way virtual wall”.
- Now when joining a temi meeting, there will be a new login option “Sign in with temi account”. This will allow user to login to temi center and join the meeting.
- Feature updates: The tilt angle for robot sitting at Homebase now can be edited.
- Minor bug fixes and improvements.

For additional information regarding temi Center and its features, please refer to temi Center User Manual [Here](#).

Mobile App:

- Now when users click a temi meeting link, it will open the temi mobile app and join the meeting instead of joining with browser.
- Add a new button which will allow users to switch front and back camera during the telepresence.
- Improvements for the performance of meetings.
- Minor bug fixes and improvement.

Launcher:

- Add a new feature “One-way virtual wall”: a new setting of creating a virtual wall path that only allows robot to cross it from one side but not the other.
- Add a new tab “All apps view” under Setting page. This will allow users to check all the apps installed into the robot and not limited to those showed on the Menu page.
- Now users can set tilt angle for robot on Homebase.
- Issue with Weather app not running properly has been fixed.
- Minor bug fixes and improvement.

Robox:

- Supporting new feature “One-way virtual wall”
- Improvements for path plan procedures.
- Improvements for user experience in skidjoy control mode.
- Minor bug fixes and improvement.

For Developers:

- Upgraded SDK features (more information available on GitHub)

User Manual:

Temi's full [User Manual](#) is available for viewing and downloading on our [Support Center](#). The User Manual is updated with every software update to include all new features and capabilities.

We appreciate your feedback which helps us improve - please stay in touch through any of our channels for thoughts, issues and suggestions.
