

THE PERSONAL ROBOT

Last Updated: Jan 19th, 2022

Temi robot OS version 127 Release notes

temi should prompt a message saying that an update is available, if temi doesn't display the message please go to Settings and tap Software update to update your temi.

If temi prompts "no pending updates" please contact our Help Desk via our [website](#) or at 833-902-0202.

To verify your *temi* has been updated, go to Settings > About and make sure that:

"Launcher OS" shows 16056

"Robox OS" shows 127.28

To verify your *mobile app* is the most updated version - go to the About tab in the temi mobile app and verify your version number is as follows:

iOS users - Version 1.1.50 (4)

Android users - Version 1.3.8554

For full details regarding this update and the new and improved features, please refer to our [User Manual](#), the [temi Center User Manual](#) and [tutorial videos](#).

Here are some of the main improvements this update will bring into your temi:

temi Center:

- New! Tour Guide feature - ability to configure guided tours by temi
- Set a web page (from url) as the Main Screen of temi
- Trigger a web page from the Custom Screen and Custom Q&A
- Mode Scheduler - ability to set a Mode on a specific time
- Active Approach on Greet Mode - will make temi actively approach users when near by.
- Pressing "Long Press" on the screen while in telepresence will make temi go to that pressed spot.
- Manual reposition - the ability to tell temi where it is in cases of false positioning
- Bug fixes and improvements

For additional information regarding temi Center and its features, please refer to temi Center User Manual [Here](#).

Mobile App:

- Minor bug fixes and improvements

Launcher:

- Network Connectivity test to check that all communication from the robot out is well.
- Web browser, can be set from temi Center
- Guided tours (set via temi center).
- Active approach on Greet mode
 - Temi will approach the user upon detection
- High performances mapping mode for allocating more computations resources while mapping
- Manual reposition - the ability to tell temi where it is in cases of false positioning
- Remove home base constraint for maps actions - Import, save, reset and continue mapping.
- Add Italian Language
- Indonesian Language
 - Change the text-to-speech voice from male to female.
- Secure ADB for developers.
- Minor bug fixes.

Robox:

- Smart joystick with obstacle avoidance ability
- Improved go to arrival accuracy when in No Bypass Mode
- Ability to slow down the robot once it's close to an obstacle.
- Improved shaking issue when the robot is in a near proximity during follow mode.
- Minor bug fixes and improvement.

For Developers:

- Upgraded SDK features (more information available on [GitHub](#))

User Manual:

temi's full [User Manual](#) is available for viewing and downloading on our [Support Center](#). The User Manual is updated with every software update to include all new features and capabilities.

We appreciate your feedback which helps us improve - please stay in touch through any of our channels for thoughts, issues and suggestions.
