THE PERSONAL ROBOT

Last Updated: Mar 31st, 2022
Temi robot OS version 128 Release notes

temi should prompt a message saying that an update is available, if temi doesn't display the message please go to Settings and tap Software update to update your temi.

If temi prompts "no pending updates" please contact our Help Desk via our [website](#) or at 833-902-0202.

To verify your *temi* has been updated, go to Settings > About and make sure that:
"Launcher OS" shows 16398
"Robox OS" shows 128.08

To verify your *mobile app* is the most updated version - go to the About tab in the temi mobile app and verify your version number is as follows:
iOS users - Version 1.1.52
Android users – Version 1.3.8640

For full details regarding this update and the new and improved features, please refer to our [User Manual](#), the [temi Center User Manual](#) and [tutorial videos](#) .

Here are some of the main improvements this update will bring into your temi:

temi Center:

- Added the Organization feature - ability to configure the members in your business in a brand-new way
- Agora SDK update to support chrome 100
- Ability to search locations on telepresence
- Added options "Accurate Location Arrival" and "Sensors Settings" under Navigation Settings tab.
- Fix Go back UI language unification issue.
- Now in sequence, robot can be set to go backwards, which means temi can face the user while leading users to the location.
- Design improvement in Map Editor.
- Bug fixes and improvements

For additional information regarding temi Center and its features, please refer to temi Center User Manual Here.

Mobile App:

- Now supporting new feature Organization

Launcher:

- Now supporting new Organizations feature
- Added search box on custom screen function button page.
- Added accurate arrival option under Setting -> Navigation tab.
- Updated sensor configuration UI and description.
- Removed restriction when naming newly added locations.
- Now when the map is set in temi center, the robot will do a repose if it is not at Homebase.
- Repose notification will be blocked when reset map notification is active.
- Minor bug fixes.
-

Robox:

- Supporting accurate arrival option in go to function.
- Compatibility for Temi V3 tablet.
- Now robot will perform a continuous path plan while seeing obstacles.
- Minor bug fixes and improvement.

For Developers:

- Upgraded SDK features (more information available on GitHub)

User Manual:

temi's full User Manual is available for viewing and downloading on our Support Center. The User Manual is updated with every software update to include all new features and capabilities.

We appreciate your feedback which helps us improve - please stay in touch through any of our channels for thoughts, issues and suggestions.
