OS136 Highlights: Temi Statistics

Temi robot OS version 136 Release Notes
Updated on: **July 18, 2025**

temi should prompt a message saying that an update is available, if temi doesn't display the message please go to **Settings** and tap **Software update** to update your temi.

If temi prompts "no pending updates" please contact our Help Desk via our website, mobile app or temi Center, or at 833-902-0202.

To verify your *temi* has been updated, go to Settings > About and make sure that:
"Launcher OS" shows **18680**
"Robox OS" shows **136.11** or **1136.11**
"firmware" shows **20241210** or **20241224 (JP)** or **20250523 (CN)**

To verify your *mobile app* is the most updated version - go to the About tab in the temi mobile app and verify your version number is as follows:
iOS users – **1.136.0(1)**
Android users – **1.3.9043**

For full details regarding this update and the new and improved features, please refer to our <u>User Manual</u>, the <u>temi Center User Manual</u> and <u>tutorial videos</u> .

temi Launcher

- [NEW] Manual lock functionality added via the power button. (Only available when password is set at Temi Center)
- [NEW] Added Azerbaijani language support to temi launcher.
- [NEW] General Settings now include an option to mute speaker bass for clearer voice during telepresence.
- [NEW] Added "Repose from location" option under Map Editor -> Repose -> Repose from location, in addition to manual and auto repose.
- [IMPROVEMENT] Function Button sequences in Custom Screen are now pre-fetched at the time of setup for faster playback, eliminating the need for an initial run to fetch data.
- [FIX] Resolved 5G NSA display issue.
- [FIX] Weather detection issue for current location on some devices.
- [FIX] Minor bug fixes in Meeting, Subscription, and Sequence functionalities.

temi Browser

- [NEW] Now uses desktop user agent.
- [FIX] Resolved issues preventing camera, microphone, or media playback in certain use cases.

temi Center

- [NEW] Direct screen control shortcut for smoother screen control experience.
- [NEW] Added support for keyboard input during screen control.
- [NEW] Added option to play a sequence action upon failing to navigate to a location, configurable under Settings -> Navigation -> Go to abort sequence.
- [NEW] Added Analytics feature, collecting data hourly from the date of upgrading to OS136 (beta included). Data is tied to each organization a temi is assigned to and resets upon factory reset and reassignment to a new organization. Data persists if reassigned back to the original organization.
- [NEW] Option to completely hide the top bar in Custom Screen, including the mini white bar in the middle.
- [NEW] Added a new "Who is temi" sequence template.
- [IMPROVEMENT] Sequence: TTS action can now be repeated.
- [IMPROVEMENT] Sequence: Added longer delay-to-start options.
- [IMPROVEMENT] Reduced frequency of auto logout to enhance user experience.
- [FIX] Minor bug fixes in Subscription, Tour, and Sequence functionalities.

temi Facial Recognition

- [IMPROVEMENT] SDK startFaceRecognition now requires withSdkFaces = true to use faces registered via SDK.
- [IMPROVEMENT] Enhanced stability when frequently turning face recognition ON/OFF.

temi Mobile App

iOS

- [IMPROVEMENT] Improved QR scan functionality on certain devices.
- [NEW] Added Privacy status and Dynamic mode status displays.

Android

- [IMPROVEMENT] Improved QR scan functionality on certain devices.

temi Launcher (Platform / Temi Go)

- [FIX] Resolved wake-up issue.

Robox (Navigation)

- [IMPROVEMENT] Enhanced green path tracking accuracy.
- [IMPROVEMENT] Improved docking performance.
- [IMPROVEMENT] Enhanced localization accuracy.
- [FIX] Fixed issues with broken maps in certain cases.

For Developers
